Hello,

I am writing in response to your current opening for a Mechanical Designer posted on Indeed.

I've been working as an Industrial Designer since 2007, using AutoCAD and Autodesk Inventor/Vault, Creo/Windchill and Solidworks. I've worked designing everything from orthopedic implants and surgical instrument assemblies, sheet metal fixtures and chemical connections for Intel, to retail space and fixture design for Apple. I enjoy product/process improvement, and I'm experienced in programs such as SAP, Office and NextDocs.

I'm ready to find new opportunities in the Southern US, and I am eager to put my CAD skills to work for a progressive, efficient organization.

Attached is my resume for your review. Please feel free to contact me, at 503-522-8280 or timba23@gmail.com to further discuss my qualifications.

Thank you for your attention, and I look forward to hearing from you.

Sincerely,

Timothy Randall
