Dear Braun NW Inc. Hiring Manager and or Team,

I'd love to design emergency vehicles, serve 1st responders!

To be clear, I'm applying to this position as an Industrial Transportation Designer which is relative to an Engineer. I believe my relative experiences designing trucks for Kenworth and Mack, and 2D/3D design skills including Autodesk Alias (CAD) could be very useful in this role.

That said, please have a look at my attached résumé with portfolio link (upper left corner in the grey box). I welcome the chance to speak with you!

Best regards,

Wallace Preston
