7 November 2020

Greetings Braun Northwest.

I am applying for the Designer position that I found listed on your website. I'm very excited for an opportunity to work for a local company here where I live, in Chehalis. I am fairly familiar with Autocad Inventor because it is the program I've used for all of my school projects while attending Saint Martin's University. I graduate will be fully graduated with a Bachelor of Science in Mechanical Engineering in mid-December of this year.

While I've used Inventor quite a bit and am good at 3D modeling, I have only a little experience with sheet metal designing. But I'm confident I could learn this aspect of the program fairly quickly.

I hope that in the future I will find myself working at Braun NW.

Best regards,

A handwritten signature in black ink that reads "Christian Merrikin". The signature is written in a cursive style with a large initial 'C'.
