

To Whom It May Concern:

I am a very hard working, motivated individual.

I changed my career path in 2011 to put my physical health before my career. I had worked for the State of Alaska for over 11 years and needed to get up and start working physically. I can do both clerical duties and warehouse work. I started as a part-time employee in a warehouse for John Deere. I knew nothing about farm equipment, but I caught on fast. I can learn your business, and bring years of other warehousing ideas to the table.

I drive forklift/clamp (Crown) daily and have no problem lifting 50 lbs or so. I believe my attention to details and the ability to organize, as well as prioritize, will meet your company's standards.

Sincerely,

Kathleen Perfect
