Dear Nichole Seick

I would like to work with the company because I am seeking a job that is unique and I love the idea of painting. I took an art class in my final year in Highschool. I want this job because I get to paint for a living and get a fun useful skill I could use and apply. I want to have a job that didn't make me feel like a robot. I want a problem-solving hands-on moving-around job. The thought of saying I work at fast food is nothing I want to brag about. I want to say I paint vehicles which is something I'm happy to say.

I recently graduated and am trying new things, getting out there. I have painted houses and painted in shop class for 3 years. I feel that I could be a useful worker with the determination to always do my best. I am great at getting into awkward and high places and getting my task done properly and efficiently.

I grew up in Oregon but also lived and graduated in Idaho. I try to make my job fun and keep a smile on my face along with my co-workers. I will be a dependable employee that loves his job. A little side goal of mine is to paint my car. I hope to use the knowledge from this career to change it into a reality. I would like to thank you for your time and look forward to the opportunity to work for your company.

Sincerely,

Mathew Graham
