Cover Letter:

Hello to whom may read this,

my name is Seth Carl, a Mechanical Engineering student at Saint Martin's University in Lacey Washington and I'm very interested in working at Braun Northwest not only because its close by, but that I want to ensure our medical equipment is top notch and safe! I acquired my Bachelors of Science in Mechanical Engineering last May and I am about to complete my Masters of Science in Mechanical Engineering this May. In fact, I only need to take one class this next semester to complete my Masters degree. It is an online class from 5pm to 7pm. Because of this I'm hoping to start working as soon as possible! I am proficient in 2D and 3D cad modeling, I have experience with CNC machinery and 3D printers among many other types of machinery. I've volunteered for more than 100 hours at a local makers space and I'm working as a project lead in a ASME school club project that works towards finishing a custom tractor build primarily focused on the hydraulics system. I'm sure I'd be a great addition to the team at Braun Northwest! I'm hard working and very patient with people and problem solving. I work well by myself as well as in teams. I'm sure that with minimal training I will exceed your standards in less than a month.

Sincerely,

-Seth Carl
