## EXPERIENCE

07/2018 – 07/2021

**AUDITOR**, TRAVIS INDUSTRIES

I oversaw inspecting all gas fireplaces prior to them leaving the warehouse. My job duties included dismantling a portion of the fireplace, hooking it up to an exhaust vent, connecting a gas line and starting the fireplace. I was responsible for maintaining specific temperatures and verifying the fireplace was safe and efficient prior to reassembling and putting back on the pallet to be sent to the consumer. If the fireplace had any defects during the testing process, I was responsible for reporting the defect and having it sent back to the line for repairs.

## EDUCATION

**GED**, ONLINE

## SKILLS

- As a fireplace auditor I regularly used a computer for data entry and power tools to disassemble and reassemble to units
- I am outgoing and great with people
- Punctual
- Hardworking
- Take pride in my work

## ACTIVITIES

I enjoy keeping busy and working with my hands. I am currently in the process of fixing up a home which I just purchased with my wife and raising our 2 new puppies. In my spare time I like to research new vehicles that are on the market such as specs and maintenance.
