Dear Hiring Manager,

I am writing to express my interest in the Emergency Response Vehicle Designer/CAD position that your company has posted. I believe that my experience and skills make me a strong candidate for this position.

I have been working as a Topology Coder for the past year, and have experience with both the software and hardware aspects of design. I have worked on projects ranging from precise low voltage circuitry to modeling large expressways and intersections autonomous vehicle applications. I have also worked on several projects as part of a team, which has given me valuable experience working with others in various collaborative ways.

My work as a Topo Coder has given me the opportunity to develop my skills in both 2D and 3D design. I have also gained valuable experience using AutoCAD, Fusion360, Prusaslicer, MATLAB, and other software. I am confident that I can quickly learn any new software that is required by Braun Northwest.

I am super interested in this position because it would allow me to use my skills in an exciting new environment, and it would also allow me to expand on my knowledge gained through my studies. I am also extremely interested in being a part of the team because of its reputation for excellence, and emphasis on a family-focus atmosphere. I believe that my background and skills would be a good fit for your company, and would be able to contribute to the continued success of Braun Northwest.

I would appreciate the opportunity to meet with you to discuss how my skills could benefit your company. Thank you for your time and consideration.
