## Work Experience

---

### **Ski lift builder**

Doppelmayr - Steamboat Springs, CO

May 2022 to October 2022

I did everything from tying the rebar to fly in the concrete with a helicopter for remote locations setting steel with a helicopter or crane if the tower Hall wasn't in a two remote location. Climbing 100-ft plus Towers torquing bolts too many tests to list but literally just built the biggest Gondola ski lift in North America

### **Deckhand**

Shearwater fv - King Salmon, AK

June 2021 to July 2021

Alaska fisherman in Bristol bay for the salmon run. Operate the boat, pick and bleed fish, engineer mechanic maintaining the diesel motor and also RSW refrigeration system for cooling the fish.

### **Self Employed Contractor**

I build sheds - Tacoma, WA

November 2019 to May 2021

I would get sub contracted out to build storage sheds. Commute to Tacoma every morning to the shop I would precut a lot of my lumber and make it in to a kit so I would have less to cut onsite. Very good communication skills talking with customers and building there desired shed in they're desired location. Very skilled with power tools nail guns and reading and designing my own dimensions. Years of experience in physical labor I would build 4 to 5 sheds a week usually a entire shed in one day.

### **Fireplace Installer**

Olympia Fireplace and Spa - Olympia, WA

August 2018 to July 2019

Lead installer. Position required me to look at my paperwork for my job or jobs for the day that would have a parts list and then pictures and notes in telling what was needed to complete the job. Pulling parts from shop loading the truck and driving to the destination. Reading manuals to stoves and by going off the dimensions and required clearances I would map out everything and by using power tools stud finders, plumb bobs and everything u could imagine to put the fireplace in the precise spot it's desired to go and the exact amount of pipe threw and out the roof. Lots of experience plumbing hundreds of feet of gas with black iron and flex. Which would require threading and designing ways to plump around obstacles and pressurizing and testing for leaks.

## Education

---

### **High school diploma**

Toledo High School - Toledo, WA

September 2003 to June 2007

## Skills

---

- Forklift
- Warehouse Experience
